

Talking Tots Narrative night & day game

This game will help your child to develop important language skills such as:

- early sequencing skills
- word building
- word sorting & grouping

How to play the game:

- Print off a set of pictures and cut up the smaller pictures into little cards.
- Give your child the night and day gameboard and talk about the pictures eg; “Can you see the sunshine? The sun comes out in the daytime and we do lots of things in the daytime. Now can you see the moon” etc ...
- Next give your child the smaller pictures and spread them out in front of you and talk about them eg; “Look at all your pictures ... you’ve got pictures of some things that happen in the daytime and some that happen at night time - we need to put them in the right place!”

- Together sort the pictures on to the right side of the board, naming and talking about each one in turn.
- When you've sorted the pictures you could make up a story using the pictures to guide you.
